

Animal Memory Game

Supplies

- 2 copies of the Animal Memory Game cards for each child
- crayons or washable markers
- scissors

Directions

Help children color the animal cards. They should color each pair of animals to look alike. Help children cut out the cards. Use the cards to play a game of memory. Children should turn all of the cards so they are facedown on the floor or a table in front of them. They should begin by turning over one card and then trying to find its match. If they find a match they may keep the pair of cards. If they do not find a match they should turn over both cards and try again. Kids can use the pairs of animals as a reminder that the animals boarded the ark in pairs and they came off the ark with Noah after the flood.

Genesis 7-9

Noah and the Flood
